This research was supported by grant P01-HD31921 from the National Institute of Child Health and Human Development. Further information may be obtained by contacting Jo Jones, PhD, Project Manager, 919/962-8412 (email: jo_jones@unc.edu) at the Carolina Population Center, CB# 8120 University Square, Chapel Hill NC 27516-3997.

Guide to the Variables Used to Screen Which Questions Were Asked of Which Respondents

- AGE** Calculated by subtracting the date of birth (H1GI1M, H1GI1D, H1GI1Y) from the current date on the laptop (IMONTH, IDAY, IYEAR).
- There were a few cases where the internal clock was not correctly set for the current date (IMONTH and IYEAR were 1/94 or 1/95). Respondents' ages were miscalculated during the interview.
- In cases where the respondent refused to provide a birth date (H1GI1M, H1GI1D, and H1GI1Y equaled "97," "97," and "97"), respondents were treated as if they were under 15.
- DAD** The household member identified in H1HR3A through H1HR3T as the respondent's father ("11"). If neither a mother nor a father was listed, the respondent was asked to identify whom from the household roster acted in the place of a father (H1HR13); if a person was identified who acted in the place of a father, questions referring to DAD were asked about that person.
- DRINK** Respondents were defined as having drunk alcohol if they answered "1" to question H1TO12.
- DRUGS** Respondents were defined as having used drugs if they answered ">0" to H1TO30 or H1TO34 or H1TO37 or H1TO40.
- MARRIED** Respondents were defined as being married if they answered H1GI17 as "2 (married)."
- For Section 17: Motivations to Engage in Risky Behaviors, an "ever married" definition was used; anyone who answered "1" to H1GI15, skipped over this section.
- MOM** The household member identified in H1HR3A through H1HR3T as the respondent's mother ("14"). If neither a mother nor a father was listed, the respondent was asked to identify who from the household roster acted in the place of a mother; if a person was identified who acted in the place of a mother (H1HR12), questions referring to MOM were asked about that person.
- OTHER SEX** Biological sex of the nominated partner is not equal to the biological sex of the respondent.
- PFL** Indicated that the respondent had been identified as having a physical or functional limitation from either responses to (1) the in-school data or (2) questions in the in-home instrument. Persons identified as having a physical limitation completed a special section of the instrument to determine type and severity of limitation.

*In Home Questionnaire Code Book
Introductory Guides*

REL	The relationship of the household member to the respondent coded at H1HR3A-T.
SAME SEX	Biological sex of the nominated partner is the same as the biological sex of the respondent.
SCHOOL NOW	A respondent was defined as being in school now if it was currently the 1994-1995 school year (SCH_YR = "1") and that the respondent was presently in school (H1GI18 = "1").
SEX	Respondents were defined as having had sexual intercourse if H1CO1 = "1."
STUDY SIB	An interviewer-entered variable indicating that the 12- to 18-year-old adolescent from the household roster was also selected to participate in the study.

Guide to Preloaded or Constructed Variables

AID	Respondent identifier number.
BIO_SEX	Preloaded variable, confirmed by interviewer, indicating that the respondent is male or female.
FR_FLAG	A preloaded variable that determined how many male and female friends the respondent was asked to list and roster. A value of "1" indicates that the respondent was only asked to list one male and one female friend; a value of "0" indicates that the respondent had the opportunity to list up to five male and five female friends.
MACNO	Machine number on which the adolescent interview was recorded.
NRRXFLG1	A dummy variable indicating that the first partner nominated in Section 26: Non-Relationship History should have completed Section 26, but instead completed the questions from Section 25. Data for these partners are found in a separate series of variables (RX) which duplicate the Relation Information series (RI).
NRRXFLG2	A dummy variable indicating that the second partner nominated in Section 26: Non-Relationship History should have completed Section 26, but instead completed the questions from Section 25. Data for these partners are found in a separate series of variables (RX) which duplicate the Relation Information series (RI).
NRRXFLG3	A dummy variable indicating that the third partner nominated in Section 26: Non-Relationship History should have completed Section 26, but instead completed the questions from Section 25. Data for these partners are found in a separate series of variables (RX) which duplicate the Relation Information series (RI).
RR_FLAG	A dummy variable indicating which respondents did not complete Section 25: Relationship Information for the up-to-three nominated partners in Section 22: Romantic Relationship Roster. Originally, respondents could nominate up to 10 romantic relationship partners. This list was to be reduced to three by asking a series of questions about characteristics of the partner. However, it was never possible to program this correctly, so early in the field period it was decided to only enter three partners regardless of whether the respondent had more.
SAMPLE SCHOOL	Preloaded variable (SCID) indicating that this is the school that the respondent attended in 1994-1995.
SCHOOL YEAR/ SUMMER	An interviewer-entered variable (SCH_YR) indicating that the 1994-1995 school year was in session at the time of the interview.
SISTER SCHOOL	Preloaded variable (SSCID) indicating that, in communities with a middle/junior high school and high school, this is the school that the respondent does not attend.

Section-by-Section Guide to Specific Variables and Recodes

General comments:

1. There are variables throughout the questionnaire which have “true” missing values, that is, a valid answer was not captured when the respondent completed the interview.
2. The comments following the legitimate skip responses reflect the answer given in the previous question only.

Section A: Setup of CAPI Interview

1. There were 11 cases where the internal clock was not correctly set for the current date—in these instances the date of interview (IMONTH and IYEAR) were entered as 1/94 or 1/95. These cases have not been corrected because a correction could affect the skips that were based on age.
2. SCH_YR—because this was an interviewer-entered variable and because interviewing spanned April through December, there are some cases with a value of “yes” for interviews occurring in late summer and fall of 1995. Some of these may be due to respondents attending summer schools or year-round schools, but some were mis-entered.

In late August, interviewers were instructed to enter “no” to this question for all respondents. However, as noted above, some interviewers entered “yes.” Because the language of some questions was based on this variable, i.e., “During this school year. . .” if the 1994-1995 school year was currently in session or “During the 1994-1995 school year. . .” if school had let out for the summer, when an interviewer entered that the school year was in session for interviews occurring in the fall, it is unclear whether the respondent was answering for the 1994-1995 school year or the 1995-1996 year.

3. Respondents who were added in the field to complete a twin or non-related adolescent pair and who did not attend a SAMPLE SCHOOL or a SISTER SCHOOL were given a SCID of “999.” They were assigned the COMMID of the original adolescent sampled.

Section 1: General Introductory

1. Some respondents who were not permanent residents of the US or were in the US for only a limited period (e.g., boarding students, exchange students, children of graduate students, or diplomats), had difficulty answering questions HIGI13M and HIGI13Y because they did not feel that they had “moved” to the United States.
2. HIGI1M/HIGI1Y—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
3. HIGI3—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
4. HIGI12—the valid response category of “999” (OTHER [country]) is not distinguishable from the reserve code of “999” (not applicable). Comments were examined for this variable and, if there was a country or region listed, the variable was recoded to reflect this information.

Countries were combined into geographic regions if the number of respondents designating those countries were 10 or fewer. The combined categories consist of:

Eastern, North Africa—Egypt, Ethiopia, Kenya, Somalia, Uganda
Western, North Africa—Algeria, Benin, Ghana, Liberia, Morocco, Nigeria, Sierra Leone, Tunisia
South Africa—Madagascar, Malawi, Mauritius, Mozambique, Reunion, St. Helena and Dependencies, South Africa, Swaziland, Zambia, Zimbabwe
Middle East—Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Saudi Arabia, Syria, Turkey, United Arab Emirates, Yemen
Central Asia—Afghanistan, Armenia, British Indian Ocean Territory, Georgia, Kyrgyzstan, Nepal, Pakistan, Russian Federation
Northern, Western Europe—Austria, Belgium, Finland, France, Greenland, Holland, Iceland, Luxembourg, Netherlands, Norway, Sweden, Switzerland
British Isles—Ireland, United Kingdom
Southern, Western Europe—Andorra, The Azores, Gibraltar, Portugal, Spain
Eastern Europe—Belarus, Croatia, Czech Republic, Hungary, Latvia, Lithuania, Moldova, Poland, Romania, Slovakia, Ukraine, Yugoslavia
Southern Europe—Albania, Greece, Italy, Malta, San Marino
Oceania and Pacific Ocean Islands—American Samoa, Australia, Cocos (Keeling) Islands, Federated States of Micronesia, Fiji, Guam, Nauru, New Zealand, Norfolk Island, Northern Mariana Islands, Papua New Guinea, Solomon Islands, Tonga, Tuvalu, Western Samoa
Central and Northern South America—Belize, Costa Rica, French Guiana, Guyana, Suriname, Venezuela
Southern, South America—Argentina, Bolivia, Brazil, Chile, Falkland Islands, Paraguay, Uruguay
Greater and Lesser Antilles—Antigua and Barbuda, Aruba, The Bahamas, Barbados, Bermuda, British Virgin Islands, Cayman Islands, Dominica, Grenada, Guadeloupe, Montserrat, Netherland Antilles, Saint Lucia, Saint Christopher and Nevis, United States Virgin Islands

5. H1GI13Y—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
6. H1GI16M/H1GI16Y—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
7. H1GI17 (current marital status)—too few cases to report; variable excluded.
8. H1GI20—the valid response category of “99” (school doesn’t have grades of this kind) is not distinguishable from the reserve code of “99” (not applicable).
9. H1GI21—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.

Section 3: General Health

1. The question H1GH1A, “Do you have difficulty using your hands, arms, legs, or feet because of a physical condition that has lasted for the past 12 months or more?” was added midway through data collection period so that the in-school question was replicated exactly in the in-home instrument. This variable will be missing for interviews which occurred early in the field period. If respondents

answered this question “yes,” the respondent was routed through Section 6: Physical/Functional Limitations.

Of the cases with missing data for this variable, 394 respondents were a special sample of adolescents who were added to the Wave 1 dataset after the close of the data collection period under a special arrangement with NORC.

2. Female respondents noted that the response categories for H1GH16 (never, just a few times, about once a week, almost every day, every day) did not adequately fit the question, “How often have you had this condition in the past 12 months? cramps during your menstrual period.”
3. H1GH31E (used steroids to gain weight or build muscle)—too few cases to report; variable excluded.
4. The valid response categories of “96,” “98,” and “99” for the number of people the respondent knew who have had AIDS are not distinguishable from the reserve codes of “96” (refused), “98” (don’t know), and “99” (not applicable).
5. H1GH59A/H1GH59B—two or more combinations of height response categories were combined to ensure that the number of respondents indicating each response was 10 or more.

Section 5: Academics and Education

1. H1ED4L (skipped 12th grade)—too few cases to report; variable excluded.
2. Early in the field period, respondents who answered “yes” to H1ED7 or H1ED9 were only able to enter their current grade in the follow-up questions, H1ED8 and H1ED10. This was corrected in version 2 of the instrument.
3. H1ED9—there are 41 respondents who indicated in H1GI21 that they were not attending school because they had been expelled for which this variable is missing.
4. H1ED10—there are 41 respondents who indicated in H1GI21 that they were not attending school because they had been expelled for which this variable is missing.
Two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.

Section 6: Physical/Functional Limitations

1. In versions 1 and 2 of the questionnaire, the skip into this section was incorrectly programmed so that if the respondent answered “yes” to H1PL1, H1PL5, H1PL6, or H1PL7, they were asked the remaining questions in Section 6.
2. In version 3, respondents had to answer “yes” to H1PL1 and “no” to H1PL2, H1PL3 and H1PL4 and “yes” to H1PL5, H1PL6, or H1PL7 in order for the respondent to complete the remainder of this section.
3. In mid-July 1995, two questions were added to the in-home interview: (1) at the beginning of the

instrument, interviewers were to answer, “From the face sheet, is this person in sample type 2?” (this variable was not output) and (2) in the General Health section, question 1A, “Do you have difficulty using your hands, arms, legs, or feet because of a physical condition that has lasted for the past 12 months or more?” If the answer to either of these questions was “yes,” the respondent answered the questions in Section 6.

4. Version 5 of the questionnaire defined PFL as anyone who (1) had a sample type of 2 (disabled) based on in-school data (question 1 added in Point 3), or (2) answered H1GH1A = “yes,” or (3) answered H1PL1, H1PL5, H1PL6, or H1PL7 as “yes.”
5. H1PL9—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
6. H1PL15—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
7. H1PL17—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
8. H1PL19—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
9. H1PL25, H1PL27, H1PL28—these variables were combined to ensure that the number of respondents indicating each response was 10 or more.
10. H1PL31, H1PL32—these variables were combined to ensure that the number of respondents indicating each response was 10 or more.
11. H1PL34, H1PL35, H1PL36—these variables were combined to ensure that the number of respondents indicating each response was 10 or more.

Section 11: Household Roster

1. There are eight cases where the respondent reported two fathers and 11 cases where the respondent reported two mothers.
2. There are four cases where the respondents entered “father’s wife” (H1HR3 = 12) and then identified this person as their biological mother (H1HR6 = “7”). The skip over question H1HR6 did not work for some reason. For these cases, questions screened on MOM were answered although they should have been skipped.
3. H1HR6A—this question is answered for two persons identified as “father’s wife.” See Section 11, Point 2.
4. H1HR6B—this question is answered for two persons identified as “father’s wife.” See Section 11, Point 2.
5. H1HR7A—in some instances, this question was not answered in integers but with a “best” guess, such as age 30+. Any variable with this non-numeric data, has been recoded by adding a “.1” to the answer. For the above example, the variable was recoded to “30.1” years old.

6. H1HR7B—in some instances, this question was not answered in integers but with a “best” guess such as age 30+. Any variable with this non-numeric data, has been recoded by adding a “.1” to the answer. For the above example, the variable was recoded to “30.1” years old.
7. H1HR5C—this question was asked for two household members who were not brothers or sisters to the respondent.
8. H1HR9A through H1HR9T—this question was asked of all household members, not just persons denoted by the respondent as a mother, father, grandmother, or grandfather as indicated in the questionnaire. If the respondent did not answer “yes” for the household member, he or she was asked H1HR10A through H1HR10T for that person. If H1HR10A through H1HR10T equaled “0” or “99,” then he or she was asked H1HR11A through H1HR11T.
9. If a respondent had not indicated a mother or father in the household, they were asked H1HR12 and H1HR13. The persons they selected from the household roster who fulfilled the role of mother or father could be of either sex.

Section 12: Non-Resident Biological Mother

1. H1NM3—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.

Section 13: Non-Resident Biological Father

1. H1NF3—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
2. H1NF8—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
3. H1NF9—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.

Section 14: Resident Mother

1. This section was to be asked for household members whom the respondent had identified as either a “father’s wife” or “mother.” Due to a programming error, this section was only asked about household members the respondent identified as “mother.”

There are 19,527 household members identified in Section 11: Household Roster as “mothers.” In 11 cases, the respondent reported two persons in the household were mothers, but there are four cases where respondents completed this section who should not have—they did not roster a household member as a mother and they reported that no one in their household acts in the place of a mother. (See Point 2, Section 11.) Therefore, this section was completed for a total of 19,520 resident mothers.

2. H1RM3—the valid response category of “999” (OTHER [country]) is not distinguishable from the

reserve code of “999” (not applicable). Comments were examined for this variable and, if there was a country or region listed, the variable was recoded to reflect this information.

Countries were combined into geographic regions if the number of respondents designating those countries were 10 or fewer. The combined categories consist of:

Eastern, North Africa—Egypt, Ethiopia, Kenya, Somalia, Uganda
Central, North Africa—Cameroon, The Central African Republic, Libya, Niger
Western, North Africa—Algeria, Benin, Ghana, Liberia, Morocco, Nigeria, Sierra Leone, Tunisia
South Africa—Madagascar, Malawi, Mauritius, Mozambique, Reunion, St. Helena and Dependencies,
South Africa, Swaziland, Zambia, Zimbabwe
Middle East—Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Saudi Arabia, Syria, Turkey, United Arab Emirates, Yemen
Central Asia—Afghanistan, Armenia, British Indian Ocean Territory, Georgia, Kyrgyzstan, Nepal, Pakistan, Russian Federation
Southeast Asia—Burma/Myanmar, Indonesia, Macau, Malaysia, North Korea, Singapore, Thailand
Northern, Western Europe—Austria, Belgium, Finland, France, Greenland, Holland, Iceland, Luxembourg, Netherlands, Norway, Sweden, Switzerland
British Isles—Ireland, United Kingdom
Southern, Western Europe—The Azores, Andorra, Gibraltar, Spain
Northern, Eastern Europe—Belarus, Czech Republic, Latvia, Lithuania, Poland, Slovakia, Ukraine
Southern, Eastern Europe—Croatia, Hungary, Moldova, Romania, Yugoslavia
Southern Europe—Albania, Greece, Malta, San Marino
Oceania and Pacific Ocean Islands—Australia, Christmas Island, Cocos (Keeling) Islands, Federated States of Micronesia, Fiji, Guam, Nauru, New Zealand, Norfolk Island, Northern Mariana Islands, Papua New Guinea, Samoa, Solomon Islands, Tonga, Tuvalu
Central and Northern South America—Belize, Costa Rica, French Guiana, Guyana, Suriname, Venezuela
Southern, South America—Argentina, Bolivia, Brazil, Chile, Falkland Islands, Paraguay, Uruguay
Greater Antilles— The Bahamas, Bermuda, British Virgin Islands, Cayman Islands, United States Virgin Islands
Lesser Antilles—Antigua and Barbuda, Aruba, Dominica, Grenada, Guadeloupe, Montserrat, Netherland Antilles, Saint Lucia, Saint Christopher and Nevis

3. H1RM4—respondents who answered “none” to this question were supposed to skip to Q.9; however, the program skipped to Q.6 instead.

Section 15: Resident Father

1. H1RF3—the valid response category of “999” (OTHER [country]) is not distinguishable from the reserve code of “999” (not applicable). Comments were examined for this variable and, if there was a country or region listed, the variable was recoded to reflect this information.

Countries were combined into geographic regions if the number of respondents designating those countries were 10 or fewer. The combined categories consist of:

Eastern, North Africa—Egypt, Ethiopia, Kenya, Somalia, Uganda
Central, North Africa—Cameroon, The Central African Republic, Chad, Libya, Niger

Western, North Africa—Algeria, Benin, Ghana, Liberia, Morocco, Nigeria, Sierra Leone, Tunisia
South Africa—Madagascar, Malawi, Mauritius, Mozambique, Reunion, St. Helena and Dependencies,
South Africa, Swaziland, Zambia, Zimbabwe
Middle East—Bahrain, Iraq, Israel, Jordan, Kuwait, Lebanon, Saudi Arabia, Syria, Turkey, United Arab
Emirates, Yemen
Central Asia—Afghanistan, Armenia, British Indian Ocean Territory, Georgia, Kyrgyzstan, Nepal,
Russian Federation
Southeast Asia—Burma/Myanmar, Indonesia, Macau, Malaysia, North Korea, Singapore, Thailand
Northern, Western Europe—Austria, Belgium, Finland, France, Greenland, Holland, Iceland,
Luxembourg, Netherlands, Norway, Sweden, Switzerland
British Isles—Ireland, United Kingdom
Southern, Western Europe—The Azores, Andorra, Gibraltar, Spain
Northern, Eastern Europe—Belarus, Czech Republic, Latvia, Lithuania, Poland, Slovakia, Ukraine
Southern, Eastern Europe—Croatia, Hungary, Moldova, Romania, Yugoslavia
Southern Europe—Albania, Greece, Malta, San Marino
Oceania and Pacific Ocean Islands—Australia, Cocos (Keeling) Islands, Federated States of
Micronesia, Fiji, Guam, Nauru, New Zealand, Norfolk Island, Northern Mariana Islands, Papua
New Guinea, Solomon Islands, Tonga, Tuvalu
Central and Northern South America—Belize, Costa Rica, French Guiana, Guyana, Suriname,
Venezuela
Southern, South America—Argentina, Bolivia, Brazil, Chile, Falkland Islands, Paraguay, Uruguay
Greater and Lesser Antilles—Antigua and Barbuda, Aruba, The Bahamas, Barbados, Belize, Bermuda,
British Virgin Islands, Cayman Islands, Dominica, Grenada, Guadeloupe, Montserrat, Netherland
Antilles, Saint Lucia, Saint Christopher and Nevis, United States Virgin Islands

Section 16: Relations with Parents

1. Refer to Point 2 in Section 11. These four people were asked the questions screened on “MOM.”

Section 20: Friends

1. FR_FLAG—in the original version of the in-home instrument, respondents who had completed an in-school questionnaire were only given the opportunity to nominate one male and one female friend. At the end of May, a decision was made to change the protocol for the 14 saturated schools so that all respondents at these schools, regardless of whether they had completed an in-school questionnaire, could nominate up to five male and five female friends.
2. H1MF3A through H1MF3E and H1FF3A through H1FF3E—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
3. H1MF5A through H1MF5E and H1FF5A through H1FF5E—if there was not a sister school linked to the respondent’s school and the respondent entered “0” to H1MF4A through H1MF4E or H1FF4A through H1FF4E for the nominated friend, then H1MF5A through H1MF5E and H1FF5A through H1FF5E was not asked for this nomination and became a legitimate skip.
4. There are three types of generic AIDs assigned to nominated friends. If the friend attended the respondent’s school, but the respondent could not find the friend’s name on the school roster, he or

she was assigned the generic AID of “99999999.” If the friend attended the respondent’s sister school, but the respondent could not find the friend’s name on the school roster, he or she was assigned the generic AID of “88888888.” If the friend did not attend either the respondent’s school or the sister school, he or she was assigned the generic AID of “77777777.”

Section 21: Ideal Romantic Relationship

1. The first activity a respondent was asked to do, was to remove any cards for activities which would NOT occur in his or her ideal romantic relationship, H1ID1A through H1ID1R. If the respondent refused to answer this question (“6”), then all these variables are coded “6” and he or she was not asked the subsequent question, that is, they could not order any of the cards, H1ID2_1 through H1ID2_17. These variables are all ● (missing). If, however, the respondent didn’t know (“8”) which activities would take place in his or her ideal relationship or thought the question was not applicable (“9”), he or she could order all the cards in the subsequent question H1ID2_1 through H1ID2_17.

Section 22: Romantic Relationship Roster

1. There was a problem in the initial program. If respondents nominated 4-10 romantic relationship partners, a series of questions were to be used to reduce the list to three partners. Since the calculation of a “score” based on the screener cases was never properly programmed, in many of these cases fewer than three partners were retained. On May 22, 1995, NORC was given instructions for the field interviewers to override the program and a memo was sent to the field interviewers on May 25, 1995. The memo stated that at the prompt for the 4th partner (H1RR2_4 Have you had a special romantic relationship in the last 18 months with any other person?), if the respondent answered “yes,” the interviewer was asked to enter that the respondent mentioned a 4th partner in a comment box but to enter “no” to the question. This change was incorporated into the CAPI/CASI program in time for the June 18 training.

2. Although initials of the partner were entered into the laptop, they were deleted at the close of the instrument.

Section 24: Contraception—Audio CASI

1. H1CO2Y—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
2. H1CO5Y—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
3. H1CO12—the wrong text was displayed to the respondent. Instead of, “What method of birth control did you receive?” the respondent was asked, “What method of birth control did you or your partner use?” The audio files were also incorrect.
4. H1CO14Y—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.

5. H1CO17D—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
6. H1CO17E—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
7. H1CO17G—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
8. H1CO17H—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
9. H1CO17I—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
10. H1CO17—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.

Section 25: Relationship Information—Audio CASI

1. A total of 13,562 respondents entered Section 25. These were:
 - 11,405 respondents who reported a romantic relationship partner
 - 60 respondents who reported a romantic relationship partner, but due to a programming error, had no Relationship Information captured
 - 2,097 respondents who, although they did not think of the partner as a special romantic friend, entered Section 25 by not saying “no” to H1LR4, “Did you do these three things with the same person?”
2. H1RIM_1—although only persons who entered this section from Section 23 were instructed to enter “00” for month and year if they did not consider the partner a special romantic friend, other respondents were not barred from entering “00” in either field. Of the 152, respondents who entered “00” for month, 151 skipped to the next partner or the next section. There was one case who, although he or she entered “00” for month, for some unknown reason was prompted to complete the rest of the questions for this partner.

13,495 respondents answered this question. There are seven cases where H1RIM_1 and H1RIY_1 are missing, but for whom the questions beginning with H1RI2_1 = were asked.
3. H1RI2_1—Respondents were asked this question based on their response to H1RIM_1 (month relationship began). 3,786 respondents answered this question. These were:
 - 3,771 where H1RIM_1 = 98
 - + 9 where H1RIM_1 = 99
 - + 7 where H1RIM_1 = ● (missing)
 - + 1 where H1RIM_1 = 0 and H1RIY_1 = 0 (should have skipped out of this section)
 - 2 where H1RIM_1 = 98 (should have been asked this question)

4. H1RI3_1—there are seven cases where H1RIM_1 was not equal to 0 and which are missing data on this variable.
5. H1RI4_1—there is one case where data for H1RI3_1 is missing and data for this variable is missing.
6. H1RI5A_1 through H1RI5A_3—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
7. In a fashion similar to the Ideal Relationship section, respondents were asked to remove any cards for activities which had not occurred in his or her special romantic relationship with each romantic relationship partner, H1RI21A1,2,3 through H1RI21R1,2,3. If the respondent refused to answer this question (“6”) or didn’t know (“8”) which activities had taken place in his or her romantic relationship, then all of these variables are coded either “6” or “7” and he or she was not asked the subsequent question, that is, they could not order any of the cards, H1RI22A1,2,3 through H1RI22R1,2,3. These are all • (missing). If, however, the respondent thought the activities were not applicable (“9”), then all activities were coded “9.” The respondent could, however, order all the cards in the subsequent question H1RI22A1,2,3 through H1RI22R1,2,3.
8. There is one person who rejected one card for whom the first two ordering variables, H1RI22A1 and H1RI22B1, are missing but the remaining ordering variables H1RI22C1 through H1RI22Q1 have valid data.
9. H1RI24A—respondents were asked this question if the partner was of the opposite sex and if he or she had entered card 15 as one of the ordered events in H1RI22A1 through H1RI22R1. There are five respondents for which this is missing, but for whom the remainder of the questions were asked.
10. H1RI41_1—only respondents who had intercourse with this respondent over more than one month and who indicated that they or their partner had ever used a birth control method (H1RI36_1 = “yes”) were asked this question.

Section 26: Non-Relationship History—Audio CASI

1. It was intended that respondents who had nominated fewer than three romantic relationship partners in Section 22: Romantic Relationship Roster AND who nominated partners in Section 26: Non-Relationship History would have partners shifted from Section 26 back into Section 25: Romantic Information in order to obtain this information on as many as three partners. IF the respondent had held hands, kissed on the mouth, and told the partner he or she loved or liked them, the partner would be eligible for this shifting. Information about partners nominated in Section 26 but who were asked the questions from Section 25 is found in a separate series of variables, RX.

Due to a programming error, a number of partners were shifted into the Romantic Information section who should not have been. Flags, NRRXFLG1, NRRXFLG2, NRRXFLG3, identify these partners. For any partner nominated in Section 26, the respondent would have been asked the Romantic Information questions if the respondent had held hands, kissed on the mouth, or told he or she liked or loved the partner, regardless of the number of partners for whom the respondent had already completed the Romantic Information section. Because the program branched after each partner, i.e., the respondent answered either Section 25 or Section 26 questions about one partner before moving to the next, data is presented in the following order: partner 1 RX, partner 1 NR, partner 2 RX, partner 2

NR, partner 3 RX, partner 3 NR.

From question 1 through question 41 there will be questions where the respondent was able to continue without providing an answer to a question or by answering with an invalid value. These responses appear as a ● (missing) response. Questions with a large number of missing data will be addressed individually.

2. H1NR4—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.

Partner 1

1. The frequency ● (missing) beginning with question 13 through question 43 should be 2,191. The following is a breakdown of the missing 2,191:

2,128	no data: answered “refused,” “don’t know,” or “not applicable” when asked for initials
63	no data: programming error so that these cases do not have data in either the RX or NR parts of Section 26
2,191	total with missing data for partner 1 in Section 26

RX Partner 1

1. 1,539 respondents were skipped to this section based on their answers to H1NR10_1, H1NR11_1 and H1NR12_1.
2. H1RX1M_1—if a respondent answered “0” (I don’t consider this person to be a special friend) when asked what month the relationship began, the remainder of the questions for this section were asked. The respondent was NOT skipped out as in Section 25 with a response of “0.”
3. H1RX5A_1—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
4. H1RX15_1—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
5. H1RX25M1, H1RX25Y1, H1RX26M1, H1RX26Y1—the reserve codes of “96,” “98,” and “99” become “0” when evaluated by the software that was used for the data collection. This appears to affect the skips for questions 27 through 41 when both H1RX25M1/ H1RX25Y1 and H1RX26M1/H1RX26Y1 are answered with any combination of the above reserve codes.

In some of these cases the respondent is asked all three sets of contraceptive questions. This data has not been recoded for consistency and all of the answers provided by the respondents have been kept.

NR Partner 1

1. 1,687 individuals gave information in the non-romantic section about their sexual partners.
2. H1NR14_1—the instructions for these questions say to skip question 14 if the partner is not between the ages of 12 and 18 and if the 1994-1995 school year is not currently in session. Due to a programming error, there was no skip based on age. However, for 120 respondents, question 14 was skipped because the school year was not in session.
3. H1NR23M1, H1NR23Y1, H1NR24M1, H1NR24Y1—the reserve codes of “96,” “98,” and “99” become “0” when evaluated by the software that was used for the data collection. This appears to affect the skips for questions 25 through 39 when both H1NR23M1, H1NR23Y1 and H1NR24M1, H1NR24Y1 are answered with any combination of the above reserve codes.

In some of these cases the respondent is asked all three sets of contraceptive questions. This data has not been recoded for consistency and all of the answers provided by the respondents have been kept.

5. H1NR26_1 through H1NR43_1—the skip instructions were not followed for these questions. Some of the missing values should be logical skips and some answered questions were not supposed to be answered so NO recoding has been done to make these questions consistent with the skip instructions in the codebook.
6. H1NR46_1 through H1NR53_1—questions 46 through 49 were to be asked if question 45 was equal to “1.” These questions were also asked if question 45 equaled “96,” “98,” or “99.” Questions 50 through 53 were to be asked if question 50 was greater than “1.” Answers of “96,” “98,” and “99” were also included in this group and these respondents were asked questions 50 through 53. So if the answer to question 45 was one of the reserved codes (“96,” “98,” “99”), then questions 46 through 53 were asked of these people.

Partner 2

1. The frequency ● (missing) beginning with question 13 through question 43 should be 3,877. The following is a breakdown of the missing 3,877:
 - 3,846 no data: answered “refused,” “don’t know,” or “not applicable” when asked for initials or did not report a second sex partner, skipped questions 13 through 43
 - 31 no data: programming error so that these cases do not have data in either the RX or NR parts of Section 26
 - 3,877 total with missing data for partner 2 in Section 26

RX Partner 2

1. 561 respondents were skipped to this section based on their answers to H1NR10_2, H1NR11_2, and H1NR12_2.
2. H1RX1M_2—if a respondent answered “0” (I don’t consider this person to be a special friend) when asked what month the relationship began, the remainder of the questions for this section were asked. The respondent was NOT skipped out as in Section 25 with a response of “0.”
3. H1RX5A_2—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
4. H1RX15_2—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
5. H1RX25M2, H1RX25Y2, H1RX26M2, H1RX26Y2—the reserve codes of “96,” “98,” and “99” become “0” when evaluated by the software that was used for the data collection. This appears to affect the skips for questions 27 through 41 when both H1RX25M2, H1RX25Y2 and H1RX26M2, H1RX26Y2 are answered with any combination of the above reserve codes.

In some of these cases the respondent is asked all three sets of contraceptive questions. This data has not been recoded for consistency and all of the answers provided by the respondents have been kept.

NR Partner 2

1. There is no way to calculate the number of respondents who refused to give initials for the second

partner, as was possible with the first partner. For questions 10, 11, and 12 there are 3,846 missing values; these are respondents who either had only one non-romantic relationship OR who refused to give initials.

2. 980 individuals gave information in the non-romantic section about their second sexual partners.
3. H1NR13_2—there is one person who answered question 14 but has missing data for question 13.
4. H1NR14_2—the instructions for these questions say to skip question 14 if the partner is not between the ages of 12 and 18 and if the 1994-1995 school year is not currently in session. Due to a programming error, there was no skip based on age. However, for 71 respondents, question 14 was skipped because the school year was not in session.
5. H1NR23M2, H1NR23Y2, H1NR24M2, H1NR24Y2—the reserve codes of “96,” “98,” and “99” become “0” when evaluated by the software that was used for the data collection. This appears to affect the skips for questions 25 through 39 when both H1NR23M2, H1NR23Y2 and H1NR24M2, H1NR24Y2 are answered with any combination of the above reserve codes.

In some of these cases the respondent is asked all three sets of contraceptive questions. This data has not been recoded for consistency and all of the answers provided by the respondents have been kept.

6. H1NR26_2 through H1NR43_2—the skip instructions were not followed for these questions. Some of the missing values should be logical skips and some questions were answered that were not supposed to be answered—NO recoding has been done to make these questions consistent with the skip instructions in the codebook.
7. H1NR46_2 through H1NR53_2—questions 46 through 49 were to be asked if question 45 was equal to “1.” These questions were also asked if question 45 equaled “96,” “98,” or “99.” Questions 50 through 53 were to be asked if question 50 was greater than “1.” Answers of “96,” “98,” and “99” were also included in this group and these respondents were asked questions 50 through 53. So if the answer to question 45 was one of the reserved codes (“96,” “98,” “99”), then questions 46 through 53 were asked of these people.

Partner 3

1. The frequency ● (missing) beginning with question 13 through question 43 should be 4,649. The following is a breakdown of the missing 4,649:

4,631	no data: answered “refused,” “don’t know,” or “not applicable” when asked for initials or did not report a third sex partner, skipped questions 13 through 43
18	no data: incorrect skip used and these cases do not have data in either the RX or NR parts of Section 26 for the third partner
4,649	total with missing data for partner 3 in Section 26

RX Partner 3

1. 186 respondents were skipped to this section based on their answers to H1NR10_3, H1NR11_3, and H1NR12_3.

*In Home Questionnaire Code Book
Introductory Guides*

2. H1RX1M_3—if a respondent answered “0” (I don’t consider this person to be a special friend) when asked what month the relationship began, the remainder of the questions for this section were asked. The respondent was NOT skipped out as in Section 25 with a response of “0.”
3. H1RX5A_3—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
4. H1RX15_3—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
6. H1RX25M3, H1RX25Y3, H1RX26M3, H1RX26Y3—the reserve codes of “96,” “98,” and “99” become “0” when evaluated by the software that was used for the data collection. This appears to affect the skips for questions 27 through 41 when both H1RX25M3, H1RX25Y3 and H1RX26M3, H1RX26Y3 are answered with any combination of the above reserve codes.

In some of these cases the respondent is asked all three sets of contraceptive questions. This data has not been recoded for consistency and all of the answers provided by the respondents have been kept.

NR Partner 3

1. There is no way to calculate the number of respondents who refused to give initials for the third partner, as was possible with the first partner. For questions 10, 11, and 12 there are 4,631 missing values; these are respondents who either had only one non-romantic relationship OR who refused to give initials.
2. 583 individuals gave information in the non-romantic section about their third sexual partners.
3. H1NR14_3—the instructions for these questions say to skip question 14 if the partner is not between the ages of 12 and 18 and if the 1994-1995 school year is not currently in session. Due to a programming error, there was no skip based on age. However, for 37 respondents, question 14 was skipped because the school year was not in session.
4. H1NR23M3, H1NR23Y3, H1NR24M3, H1NR24Y3—the reserve codes of “96,” “98,” and “99” become “0” when evaluated by the software that was used for the data collection. This appears to affect the skips for questions 25 through 39 when both H1NR23M3, H1NR23Y3 and H1NR24M3, H1NR24Y3 are answered with any combination of the above reserve codes.

In some of these cases the respondent is asked all three sets of contraceptive questions. This data has not been recoded for consistency and all of the answers provided by the respondents have been kept.

5. H1NR26_3 through H1NR43_3—the skip instructions were not followed for these questions. Some of the missing values should be logical skips and some answered questions were not supposed to be answered so NO recoding has been done to make these questions consistent with the skip instructions in the codebook.
6. H1NR46_3 through H1NR53_3—questions 46 through 49 were to be asked if question 45 was equal to “1.” These questions were also asked if question 45 equaled “96,” “98,” or “99.” Questions 50 through 53 were to be asked if question 50 was greater than “1.” Answers of “96,” “98,” and “99” were also included in this group and these respondents were asked questions 50 through 53. So if the

answer to question 45 was one of the reserved codes (“96,” “98,” “99”), then questions 46 through 53 were asked of these people.

Rostering information

1. The only way a respondent was not asked to roster a romantic relationship partner or a non-romantic relationship partner was to say “no” to H1RI14_1-3 or H1NR14_1-3. If the respondent refused or did not know if his or her partner attended the SAMPLE SCHOOL or the SISTER SCHOOL, he or she was asked to roster the partner.
2. There are two types of generic AIDs assigned to romantic or non-relationship nominated partners. If the partner attended the respondent’s school or the sister school, but the respondent could not find the partner’s name on the school roster, he or she was assigned the generic AID of “99999999.” If the partner did not attend either the respondent’s school or the sister school, he or she was assigned the generic AID of “77777777.”

Section 27: Motivations for Birth Control—Audio CASI

1. There is one 13-year-old adolescent who had not had intercourse who was asked this section.

Section 28: Tobacco, Alcohol, Drugs—Audio CASI

1. H1TO2—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
2. H1TO4—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
3. H1TO6Y—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
4. H1TO7—in some instances, this question was not answered in integers but with a “best” guess such as 3+. Any variable with this non-numeric data, has been recoded by adding a “.1” to the answer. For the above example, the variable was recoded to “3.1” cigarettes.

The valid response categories of “96,” “98,” and “99” for the number of cigarettes smoked per day are not distinguishable from the reserve codes of “96” (refused), “98” (don’t know), or “99” (not applicable).

5. H1TO11—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
6. H1TO14—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
7. H1TO16—the valid response categories of “96,” “98,” and “99” for the number of drinks drunk each time are not distinguishable from the reserve codes of 96 (refused), 98 (don’t know), and “99” (not

applicable).

8. H1TO30—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
9. H1TO34—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
10. H1TO36—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
11. H1TO37—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
12. H1TO40—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.

A programming error caused respondents who answered “no” to H1TO40 to skip to H1TO50 instead of H1TO43.

13. H1TO45—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
14. H1TO46—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.

Section 31: Fighting and Violence

1. H1FV14M—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
2. H1FV14Y—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.

Section 32B: Female Physical Development and Pregnancy History—Audio CASI

1. The CAPI instrument contained a programming error which affected the capture of pregnancy information. Information through H1FP9Y, “In what month and year did your most recent pregnancy begin?” is complete for all female respondents. However, beginning with H1FP10, “Between January 1, 1994, and your most recent pregnancy, how many times have you been pregnant?,” information was only captured if the respondent reported two or more pregnancies since January 1, 1994; in that instance, information on the pregnancy preceding the most recent pregnancy was obtained. This constitutes approximately 10 percent of pregnancies reported. Respondents will be asked these questions at Wave 2 for all pregnancies since January 1, 1994.
2. H1FP4—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.

3. H1FP8—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
4. H1FP9Y—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
5. H1FP10—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
6. H1FP11M1, H1FP11M2, H1FP11M3, H1FP11M4, H1FP11M5—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
7. H1FP16_1, H1FP16_2, H1FP16_3, H1FP16_4, H1FP16_5—too few cases to report, variables excluded.
8. H1FP18_1, H1FP18_2, H1FP18_3, H1FP18_4, H1FP18_5—too few cases to report, variables excluded.
9. H1FP19_1, H1FP19_2, H1FP19_3, H1FP19_4, H1FP19_5—too few cases to report, variables excluded.
10. H1FP20M1, H1FP20M2, H1FP20M3, H1FP20M4, H1FP20M5—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.

The valid response code of “98” (respondent is still pregnant) is not distinguishable from the reserve code of “998” (don’t know).
11. H1FP20Y1, H1FP29Y2, H1FP20Y3, H1FP20Y4, H1FP20Y5—the valid response code of “98” (respondent is still pregnant) is not distinguishable from the reserve code of “998” (don’t know).
12. H1FP21_1, H1FP21_2, H1FP21_3, H1FP21_4, H1FP21_5—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.
13. SECOND TWIN—no respondent reported giving birth to twins, so questions 23 through 34 dealing with the second twin are noted in the codebook but there are no associated variables.
14. H1F25MA1, H1F25MA2, H1F25MA3, H1F25MA4, H1F25MA5—too few cases to report, variables excluded.
15. H1F25YA1, H1F25YA2, H1F25YA3, H1F25YA4, H1F25YA5—too few cases to report, variables excluded.
16. H1FP26A1, H1FP26A2, H1FP26A3, H1FP26A4, H1FP26A5—too few cases to report, variables excluded.
17. H1FP27A1, H1FP27A2, H1FP27A3, H1FP27A4, H1FP27A5—too few cases to report, variables excluded.

19. H1FP29A1, H1FP29A2, H1FP29A3, H1FP29A4, H1FP29A5—too few cases to report, variables excluded.
20. H1FP30A1, H1FP30A2, H1FP30A3, H1FP30A4, H1FP30A5—too few cases to report, variables excluded.
21. H1FP31A1, H1FP31A2, H1FP31A3, H1FP31A4, H1FP31A5—too few cases to report, variables excluded.
22. H1FP32A1, H1FP32A2, H1FP32A3, H1FP32A4, H1FP32A5—too few cases to report, variables excluded.
23. H1FP33A1, H1FP33A2, H1FP33A3, H1FP33A4, H1FP33A5—too few cases to report, variables excluded.
24. H1FP34A1, H1FP34A2, H1FP34A3, H1FP34A4, H1FP34A5—too few cases to report, variables excluded.

Section 34: Parents' Attitudes

1. There was a programming error so that if a respondent indicated that there was only a DAD in the household, the only question asked was H1PA7 for the majority of the respondents living with a father only. However, there are four cases where there was a DAD and no MOM where H1PA4, H1PA5, and H1PA6 were answered; otherwise these three variables have missing values for DAD only households.

Section 37: Religion

1. In version 1, only respondents who answered "none" were correctly skipped. Later versions corrected this so that respondents who answered "refused," "don't know," or "not applicable" were also skipped.

Section 38: Expectations, Employment, Income

1. H1EE4—in some instances, this question was not answered in integers but with a "best" guess such as "7+" hours spent working for pay in a typical non-summer week. Any variable with this non-numeric data has been recoded by adding a ".1" to the answer. For the above example, the variable was recoded to "7.1" hours.
2. H1EE5—the valid response codes of "\$996," "\$998," and "\$999" earned in a typical non-summer week are not distinguishable from the reserve codes of "996" (refused), "998" (don't know), and "999" (not applicable).

In some instances, this question was not answered in integers but, for example, in a "best" guess such

as "\$75+." Any variable with this non-numeric data, has been recoded by adding a ".1" to the answer. For the above example, the variable was recoded to "\$75.1."

3. H1EE7—the valid response codes of "\$996," "\$998," and "\$999" earned in a typical summer week are not distinguishable from the reserve codes of "996" (refused), "998" (don't know), and "999" (not applicable).

In some instances, this question was not answered in integers but, for example, in a "best" guess such as "\$75+." Any variable with this non-numeric data, has been recoded by adding a ".1" to the answer. For the above example, the variable was recoded to "\$75.1."

4. H1EE8—the valid response codes of "\$996," "\$998," and "\$999" for the amount of allowance received per week are not distinguishable from the reserve codes of "996" (refused), "998" (don't know), and "999" (not applicable).

Section 39: Relations with Siblings

1. Because interviewers did not always know if other adolescents in the household were "study sibs," data about other adolescents was not being recorded routinely. In August 1995, a programming change was made so that, for all adolescents aged 12 through 18 in the household, this section was asked.

Section 40

1. H1IR8A—the valid response category of "8" for the number of people under six who were present during the interview overlap with the reserve code of "8" (don't know).
2. H1IR8B—the valid response category of "8" for the number of people 6 through 11 who were present during the interview overlap with the reserve code of "8" (don't know).
3. H1IR8C—the valid response category of "8" for the number of people 12 through 18 who were present during the interview overlap with the reserve code of "8" (don't know).
4. H1IR8D—the valid response category of "8" for the number of people 19 and older who were present during the interview overlap with the reserve code of "8" (don't know).
5. H1IR10—the valid response categories of "7" (apartment building [5 or more units]—locked entry, or guarded by doorman, or both) and "8" (other) are not distinguishable from the reserve codes of "7" (refused) and "8" (don't know). (This variable was not recoded to standard CPC reserve codes.)
6. H1IR13—the valid response categories of "7" (apartment building [5 or more units]—locked entry, or guarded by doorman, or both) and "8" (other) are not distinguishable from the reserve codes of "7" (refused) and "8" (don't know). (This variable was not recoded to standard CPC reserve codes.)
7. H1IR18—two or more response categories were combined to ensure that the number of respondents indicating each response was 10 or more.

Introductory text read to respondent:

The interview you are about to complete is called the Adolescent Health Study or Add Health. It is being conducted for the Carolina Population Center at the University of North Carolina by the National Opinion Research Center (NORC). This interview will produce important information about adolescent health and health behaviors today. During the interview, you will be asked about you and your parents' backgrounds; your family; your friends; your health; your behavior related to health; and, your plans for the future. Your answers will help us to understand the health and experiences of adolescents in the U.S. today.

All of your answers to the questionnaire will be held in the strictest confidence. No one will ever be able to connect your name with your answers. They will be identified solely by a unique identification number.

Your participation in this study is voluntary. You may decline to answer any question, and you may stop at any time. There are no right or wrong answers.

During one part of the interview, I will read a series of questions and possible responses and ask you to select one or more responses to each question. I will record your responses in my computer. For another part of the interview, I will give you the computer and a set of headphones to wear. A number of questions and possible responses will be read to you over the headphones. You will enter your response to each question directly into the computer. I will show you how to operate the computer. Your answers to the questions, like all the information you provide, will be completely confidential; I will never see your answers to the questions you enter directly into the computer.

Section 6: Physical/Functional Limitations

Section 6 determines whether the respondent has a physical or functional limitation. If he does not, he is skipped out of the section. If he does, questions determine the extent to which it interferes with routine daily activities.

This section will ask about any physical limitations you may have, and the challenging situations you have encountered because of those limitations.

1. Do you have difficulty using your hands, arms, legs, or feet because of a permanent physical condition?			H1PL1	num 1

Section 11: Household Roster

Section 11 collects information about the members of the respondent's household and about household history. Special attention is paid to establishing the relationships between the respondent and other household members.

The following questions are about the people with whom you live.

1. Please tell me the first names of all the people, other than you yourself, who live in your household. If someone usually lives with you, but is away for a short time, include him or her. At the end of the interview today, the names of these people will be erased from the computer. We need a list now only so we can keep track of people during the interview.

Section 12: Non-Resident Biological Mother

Section 12 is about the respondent's biological mother—her education and place of birth, and facts about the respondent's social relationship with her. It is administered only if the mother is not a member of the respondent's household.

Now I'm going to ask you questions about your biological mother who is not living with you at this time.

<i>This section is administered if MOM ≠ "biological mother."</i>

Section 14: Resident Mother

Section 14 is about the woman who functions as a mother in the respondent's household; she could be the biological mother, step mother, foster mother, or adoptive mother, or perhaps a grandmother or aunt. If there is no such woman, the section is skipped. Topics include education, place of birth, employment, and presence in the household.

[Hand R show card 14.] The next few questions are about {NAME}. [{NAME}] is the person for whom REL = "mother." If there is no such person, {NAME} is the person named in S.11,Q.12.]

Section 15: Resident Father

Section 15 is about the man who functions as a father in the respondent's household. If there is no such man, the section is skipped. It is virtually identical to Section 14.

[Hand R show card 14.] The next few questions are about {NAME}. [{NAME} is the person for whom REL = "mother's husband" or "father." If there is no such person, {NAME} is the person named in S.11,Q.13.]

Section 16: Relations with Parents

In Section 16, respondents are asked about various aspects of their relationship with their parents (or the parental figures in the household). In the unlikely event that a respondent lives alone, or in an institution, the section is skipped. Topics include rules, activities, educational aspirations, and perceived closeness of the relationship.

Let's talk about your relationship with your parents.

In the next questions, *parents* means {NAME}.

Section 17: Motivations to Engage in Risky Behaviors

Section 17—which deals with potential motivations to engage in or refrain from sexual intercourse before marriage—is administered only to respondents who are at least 15 years old (and who are not married).

The next questions are about how you would feel about having sexual intercourse at this time in your life. Some people have sexual intercourse before they get married. Others do not. For these questions, it doesn't matter whether you yourself have had intercourse. Just indicate whether you agree or disagree with the statements.

Section 20: Friends

Each friend is assigned a letter A-E. There will be a set of Q's 2-10 for each male friend and each female friend.

The next questions are about your friends. I will ask you for their names in order to keep track of them but their names will be erased from the computer as soon as we finish this section of the interview.

Section 21: Ideal Romantic Relationship

Section 21 deals with the social and emotional dimensions of romantic relationships. Respondents are given a set of 17 cards, each describing something that might happen in the course of a romantic relationship. They are asked to identify those things that would ideally not happen at this stage of their lives, and then to show the order in which the remaining things would happen.

The next questions are about romantic relationships. Please imagine your ideal romantic relationship in the next year. Go through this deck of cards and give me any that describe things that would NOT happen in this perfect relationship.

<p>Now look through the remaining cards and put them in the order in which you think things should first happen in your perfect relationship. Whatever you think should happen first should be the first card, the thing you would like to have happen second should be the second card, and so on. Don't worry if you think two things should happen at the same time. Just pick one of them to put first, and put the other after it.</p>

Section 23: Liked Relationship Roster

Section 23 is administered only to respondents who have not reported any romantic relationships in Section 22. It seeks to identify, by their behavior, respondents who are presently in such relationships. A “no” answer to any of questions 1-4 skips a respondent out of this section.

<i>Administer this section if S.22, Q.1 ≠ “yes.”</i>

Section 24: Contraception—Audio CASI

Section 24 begins the self-administered portion of the interview. A respondent who answers “no” to question 1—that is, who has not had sexual intercourse—is skipped out of the section. For those who have had intercourse, subsequent questions relate to the use of contraception at first and most recent intercourse, and incidence of sexually transmitted disease.

The next section of the questionnaire has been designed so that you can answer the questions yourself, rather than telling me your answers. When you get to the first question, the computer will read the question to you so that you can hear it through these headphones. It will also tell you what to do to enter your answer. We have made it very simple for you to use the computer. Let’s take a look at how it works, by completing a couple of practice questions.

Some teenagers have sexual intercourse before they are married and some do not. The next questions are about the experiences you may have had and the birth control methods you’ve used. The questions are very personal, just remember that all your answers are kept private.

Section 25: Relationship Information—Audio CASI

Section 25 collects information about each romantic relationship identified in Section 22 or 23. (If no relationships were identified, this section is skipped.) Information includes beginning and ending dates of the relationship, characteristics of the relationship partner, and activities within the relationship. Security procedures prevent the identification of relationship partners by researchers.

Ask the questions in this section for each person in the Romantic Relationship Roster.

Now we are going to ask you questions about the people you listed earlier as relationship partners.

IMPORTANT: See NOTE at beginning of code book.

Section 27: Motivations for Birth Control—Audio CASI

Section 27 is administered only to respondents who report having had sexual intercourse or who are at least 15 years old. It deals with perceived barriers to the use of contraception by those who are sexually active.

The questions that follow ask about your feelings on the use of birth control.

<p><i>This section is administered if SEX or if AGE ≥ 15.</i> How much do you agree or disagree with each of the following statements?</p>

Section 28: Tobacco, Alcohol, Drugs—Audio CASI

Section 28—which deals with smoking cigarettes, drinking alcohol, using illegal drugs, and access to firearms—is administered to all respondents. Skip patterns ensure that respondents are asked as few questions as possible.

Some teenagers have experimented with cigarette smoking, drinking alcohol and drug use. The questions that follow ask about your experience with these things. Remember, your answers will not be linked to you.

Section 30: Joint Occurrences—Audio CASI

Section 30 focuses on the concurrence of dangerous behaviors. Only respondents who have reported a behavior are asked the pertinent questions in this section. For example, only a respondent who has reported both sexual intercourse and drinking alcohol is asked questions 1-4. A respondent who has reported neither intercourse nor drinking nor using illegal drugs is asked only questions 25-26.

The next questions ask about situations that often happen to people at the same time.

Section 34: Parents' Attitudes

Section 34 asks respondents to describe their parents' attitudes towards their sexual activity and use of contraception. If a respondent has not had sexual intercourse, the questions are hypothetical. Section is skipped if currently married.

Parents often have certain feelings toward their child's sexual activity. The next few questions ask how you think your parents would feel toward your sexual activity.

[Hand show card 18.]

Regardless of whether you have done these things or not, how would your mother feel about each of the following things? (If MOM ≠ "biological mother," add: I mean, the mother you live with.)

Guide to Recoded Variables

Variables were recoded for three reasons. First, questions with response categories of “no” or “not marked” were recoded from a value of 2 to a value of 0. Second, variables were recoded to make responses consistent. For example, if an adolescent indicated he or she was not Hispanic but was Cuban, he or she was recoded to be Hispanic. Third, variables were recoded to ensure that results based on subsamples of the data were not based on a biased sample. For example, if an adolescent indicated he or she did not live with a father (Q.17) but then completed the rest of the questions about the father (Q.18 through 22), Q.18 through 22 were recoded as legitimate skips.

Global Recodes

1. Questions with response categories of “no” or “not marked” were recoded from a value of 2 to a value of 0.

Variables affected: S4, S6A through S6E, S8, S10, S11, S13, S15, S17, S19, S21, S23, S25, S26, S29A through S29E, S30A through S30E, S31A through S31E, S32A through S32E, S33A through S33E, S34A through S34E, S35A through S35E, S36A through S36E, S37A through S37E, S38A through S38E, S39A through S39E, S40A through S40E, S41A through S41E, S42A through S42E, S43A through S43E, S44A1 through S44A33, S44, S49, S54, S551 through S55D, S56, S57, S58, S65, S66, S67, S68

Consistency Recodes

1. Recoding S4 (Are you of Hispanic or Spanish origin?) and S5 (What is your background?) consistent with each other.
 - a. If a respondent did not answer “yes” to S4 but gave a specific Hispanic background in S5, then S4 was recoded as “1” (yes).
 - b. If a respondent answered “no” or “I don’t know” to S4 and either left S5 blank or answered “I don’t know,” then S5 was recoded as “97” (legitimate skip).
 - c. If a respondent left S4 blank and answered S5 “I don’t know,” then S4 was recoded as “8” (I don’t know) and S5 was recoded as “97” (legitimate skip).
2. Recoding S6C (What is your race? Asian or Pacific Islander) and S7 (What is your background?) to be consistent with each other.
 - a. If a respondent did not answer S6C but gave a specific Asian background in S7, then S6C was recoded as “1” (marked).
 - b. If a respondent did not answer S6C and S7 was not a multiple response, then S7 was recoded as “97” (legitimate skip).
3. Recoding S10 (If your school does not give letter grades, fill in this oval and go to Q.11.) and S10A through S10D (grade in English/Language Arts, Mathematics, History/Social Studies, and Science) to be consistent with each other.
 - a. If a respondent indicated in S10 that his or her school did not give letter grades, then the grade variables, S10A through S10D, were recoded as “97” (legitimate skip).

4. Recoding S23 (Are you a twin?) and S24 (Do you and your twin live in the same household?) to be consistent with each other.
 - a. If a respondent indicated in S23 that he or she was not a twin, then S24 was recoded as “7” (legitimate skip).
 - b. If a respondent left S23 blank or marked S23 with multiple responses but indicated that he or she lived in the same household as his or her twin, then S23 was recoded as “1” (yes).
 - c. If a respondent left S23 blank or marked S23 with multiple responses and indicated in S24 that he or she did not live in the same household as his or her twin, then S23 was recoded as “0” (no) and S24 was recoded as “7” (legitimate skip).
5. Recoding S25 (Are you adopted?) and S26 (Do you live with either of your biological parents?) to be consistent with each other.
 - a. If a respondent indicated in S25 that he or she was not adopted, then S26 was recoded “7” (legitimate skip).
 - b. If a respondent left S25 blank, then S26 was recoded as ● (missing).
6. Recoding S27 (How many people live in your household?) and S28 (In addition to you, how many other people who are in grades 7 through 12 live in your household?) to be consistent with each other.
 - a. If a respondent left S27 blank, then S28 was recoded as ● (missing).
 - b. If a respondent indicated in S27 that he or she lived by himself or herself or lived in a shelter or group home, then S28 was recoded to “97” (legitimate skip).
 - c. If a respondent entered a larger number of persons in S28 than in S27, S28 was recoded as “98” (error).
7. Recoding S44 (If you do not participate in any clubs, organization, or teams at school, fill in this oval.) to be consistent with participating in any of the 33 specific clubs, organizations, or teams.
 - a. If a respondent indicated participating in at least one of the listed activities (S44A1 through S44A33), then S44 was recoded as “0” (not marked).
8. Recoding S55A (a heart problem?), S55B (asthma?), S55C (other breathing difficulty?), and S55D (some other problem?) based on S54 (Do you have difficulty using your hands, arms, legs, or feet because of a physical condition that has lasted for the past 12 months or more?).
 - a. If a respondent indicated in S54 he or she did not have difficulty with his or her limbs, then S55A through S55D were recoded “7” (legitimate skip).
 - b. If a respondent left S54 blank, then S55A through S55D were recoded as ● (missing).

Subsample Recodes

1. If a respondent indicated that he or she did not live with a biological mother, stepmother, foster mother, or adoptive mother in S11, then subsequent questions regarding a resident mother were recoded “7” or “97” (legitimate skip). If a respondent did not answer S11, then subsequent questions were recoded as

- (missing).

Variables affected: S12, S13, S14, S15, S16

2. Global Recodes

1. Questions with response categories of “no, unmarked, does not apply” were recoded from a value of 2 to a value of 0.

Variables affected: PA3, PA4, PA5_1 through PA5_7, PA6_1 through PA6_5, PA7_1 through PA7_9, PA8A, PA11, PA13, PA14, PA15, PA16, PA17, PA18, PA19, PA20, PA21, PA27A through PA27E, PA28A through PA28J, PA29, PA38, PA41_1 through PA41_19, PA43, PA45, PA46_1 through PA46_19, PA48, PA50, PA51_1 through PA51_19, PA53, PA56, PA57A through PA57F, PA63, PA64, PB1, PB3, PB4_1 through PB4_7, PB5_1 through PB5_5, PB6_1 through PB6_8, PB9, PB10, PB11, PB12, PB13, PB14, PB15, PB16, PB17, PB19, PC2, PC3, PC6A, PC6B, PC7, PC10, PC11, PC12, PC14, PC15, PC16, PC21_1 through PC21_7, PC22, PC24, PC25, PC26, PC27, PC28, PC32, PC35, PC36_1 through PC36_20, PC37, PC38, PC39, PC40, PC41, PC45, PC46, PC47, PC49A_1 through PC49A_3, PC49B_1 through PC49B_3, PC49C_1 through PC49C_3, PC49D_1 through PC49D_3, PC49E_1 through PC49E_3, PC49F_1 through PC49F_3, PC50, PC51, PC52, PC53, PC54, PC55, PC56_1 through PC56_21, PC60_1 through PC60_18, PC61A through PC61D, PC62_1 through PC62_11, PC63, PC64, PC69, PD5, PD5A

2. If the respondent provided an answer to a question, the refused variable was recoded as “not refused” regardless of how it was originally marked. Refused responses were originally coded using separate variables. All questions were recoded to incorporate a refusal response code; refusals were assigned “6,” “96,” “996,” or “9996.”

Variables affected: All variables were affected.

3. If the response categories in a given question included the option “don’t know,” these responses were recoded “8,” “98,” “998,” or “9998” (don’t know).

Variables affected: PA26, PB3, PB21, PB22, PC3, PC4, PC5, PC8, PC9, PC13, PC14, PC18, PC19A_P, PC19B_O, PC20, PC22, PC23, PC37, PC38, PC39, PC40, PC41, PC47, PC49A_1 through PC49A_3, PC49B_1 through PC49B_3, PC49C_1 through PC49C_3, PC49D_1 through PC49D_3, PC49E_1 through PC49E_3, PC49F_1 through PC49F_3, PC54, PC57, PC58, PC59, PC63, PC64, PC65_M, PC65_Y, PD2, PD3, PD4A through PD4F

Consistency Recodes

1. Recoding Q.A4 and Q.B3 (Are you of Hispanic or Spanish origin?), and Q.A5 and Q.B4 (What is your Hispanic background?) to be consistent with each other.
 - a. If the respondent refused, skipped, or replied “no” to Q.A4/Q.B3, but recorded at least one Hispanic background in Q.A5/Q.B4, then Q.A4/Q.B3 was recoded as “yes.” If the respondent replied “no” to Q.A4/Q.B3, and skipped or answered “don’t know” to Q.A5/Q.B4, then Q.A5/Q.B4 was recoded as “7” (legitimate skip).

- b. If the respondent answered “yes” to Q.A4/Q.B3, but did not mark a Hispanic category in Q.A5/Q.B4, then Q.A4/Q.B3 was recoded as ● (missing).
- c. If the respondents marked “yes” to both a specific Hispanic category and the “don’t know” option in Q.A5/Q.B4, then the “don’t know” category was recoded as “0” (unmarked).

Variables affected: PA4, PA5_1 through PA5_7, PB3, PB4_1 through PB4_7

2. Recoding Q.A6 and Q.B5 (What is your race?).

- a. If the respondent did not mark any of the race categories, then all categories for Q.A6/Q.B5 were recoded as ● (missing).

Variables affected: PA6_1 through PA6_5, PB5_1 through PB5_5

- b. Q.A8B was asked only if the respondent supplied the interviewer with two or more race categories in Q.A6. If the respondent gave only one race or refused to answer Q.A6, then Q.A8 was recoded as “7” (legitimate skip).

Variables affected: PA8B

3. Recoding Q.A6 and Q.B5 (What is your race?) and Q.A7 and Q.B6 (What is your Asian background?) to be consistent with each other.

- a. If the respondent answered “yes” to any category for Q.A7/Q.B6, then the response category (Asian) in Q.A6/Q.B5 was recoded as “yes.” If the respondent marked the Asian race category in Q.A6/Q.B5, but did not mark a specific Asian background or refused to answer Q.A7/Q.B6, all Asian background response categories were recoded as ● (missing).

Variables affected: PA6_4, PA7_1 through PA7_8, PB5_4, PB6_1 through PB6_8

4. If the respondent said that he or she had at least one marriage or marriage-like relationship in the last 18 years (Q.A40>0) but did not mark any years during which he or she was married to or living with another person (Q.A41, Q.A46, Q.A51), then Q.A41, Q.A46, and Q.A51 were recoded as ● (missing).

Variables affected: PA41_1 through PA41_19, PA46_1 through PA46_19, PA51_1 through PA51_19

5. If the respondent marked a specific kind of health insurance in Q.C21_1 through Q.C21_6 and “don’t know” in Q.C21_7 (What kind of health insurance does [name] have?), then Q.C21_7 was recoded as “0” (unmarked).

Variables affected: PC21_1 through PC21_7

6. Recoding Q.C35 (Adolescent has lived away from the respondent for at least six months) and Q.C36 (Which years respondent and adolescent have lived apart) to be consistent with each other.

- a. If Q.C35 was blank, then Q.C36 variables were recoded as ● (missing).

- b. If Q.C36, “don’t know” was marked as well as an age category (e.g., 11), then the “don’t know” variable was recoded as “0” (unmarked).

Variables affected: PC36_1 through PC36_19

Subsample Recodes

1. Q.A11 was asked if the respondent did not mark “married” in answer to Q.A10 (What is your current marital status?). If Q.A10 was marked “married,” Q.A11 was recoded as “7” (legitimate skip) regardless of the response.

Variables affected: PA11

2. If the respondent refused to answer Q.A13 (Do you work outside the home?), then subsequent questions (Q.A14 through A16) were recoded as “7” (legitimate skip).

Variables affected: PA14, PA15, PA16

3. Questions A22 through A26 dealt with religion. If the respondent replied with “none” to Q.A22 (What is your religion?), then Q.A23 through A26 were recoded as “7” (legitimate skip).

Variables affected: PA23, PA24, PA25, PA26

4. Question A30 is asked only if the respondent chose more than one response category in Q.A28. If the respondent marked only one response category for Q.A28, then Q.A30 is recoded as “7” (legitimate skip).

Variables affected: PA30

5. If the respondent answered “no” to Q.A38 (Have you ever been married?), Q.A39 was recoded as “7” (legitimate skip).

Variables affected: PA39

6. The respondents were asked about their relationships, specifically marriages or marriage-like relationships. This section asked about three relationships. If the respondents said that they had no such relationships in Q.A40, then they were skipped out of this section, and Q.A41 through A54 were recoded as “7” (legitimate skip). If they said they had only one such relationship, then Q.A46 through A54 were recoded as “7” (legitimate skip). If they said they had only two relationships, then Q.A51 through A54 were recoded as “7” (legitimate skip).

Variables affected: PA41_1 through PA41_19, PA42, PA43, PA44, PA46_1 through PA46_19, PA47, PA48, PA49, PA51_1 through PA51_19, PA52, PA53, PA54

7. If the respondent said that a relationship was still going on (Q.A43, Q.A48, Q.A53) then the subquestion asking how the relationship ended was recoded as “7” (legitimate skip).

Variables affected: PA44, PA49, PA54

8. Section B asked the respondents about their current spouses or partners. In order to be eligible for this section, they must have answered “yes” to either Q.A43, Q.A48, or Q.A53. If they said “no” to all three of these questions, then all questions in Section B were recoded as “7” (legitimate skip).

Variables affected: PB2, PB3, PB4_1 through PB4_7, PB5_1 through PB5_5, PB6_1 through PB6_8, PB7, PB8, PB9, PB10, PB11, PB12, PB13, PB14, PB14, PB15, PB16, PB17, PB18, PB19, PB20, PB21, PB22

9. Recoding questions concerning the biological mother for consistency (Q.C1 through C5):
- If the respondent indicated that she was the biological mother to the study adolescent (Q.C1) then subsequent questions regarding the biological mother (Q.C2 through Q.C5) were skipped and recoded as “7,” “97,” or “997” (legitimate skip).
 - If the respondent indicated that the biological mother lived in the household (Q.C2), then subsequent questions regarding the biological mother (Q.C.3 through Q.C5) were skipped and recoded as “7,” “97,” or “997” (legitimate skip).

Variables affected: PC1, PC2, PC3, PC4, PC5

10. Recoding questions about the biological father for consistency (Q.C6B through C9):
- If the respondent indicated that he was the biological father to the study adolescent (Q.C1) then questions regarding the biological father (Q.C6B through Q.C9) were skipped and recoded as “7,” “97,” or “997” (legitimate skip).
 - If the respondent indicated that the biological father lived in the household (Q.6CB) then subsequent questions about the biological father (Q.C7 through Q.C9) were skipped and recoded as “7,” “97,” or “997” (legitimate skip).

Variables affected: PC6B, PC7, PC8, PC9

11. If the respondent indicated that the adolescent did not have a special girlfriend/ boyfriend (Q.C14), then subsequent questions (Q.C15 through C16) were skipped and recoded as “7” (legitimate skip).

Variables affected: PC15, PC16

12. If the respondent indicated that the adolescent was not in school (Q.C24), then subsequent questions (Q.C25 through C29c) were skipped and recoded as “7” (legitimate skip).

Variables affected: PC25, PC26

13. If the respondent replied “no” to Q.C35 (Was there ever a period of at least six months when [name] did not live with you?), then Q.C36 variables were recoded as “7” (legitimate skip).

Variables affected: PC36_1 through PC36_19

14. Recoding questions concerning adolescent disability for consistency (Q.C51 through C62):

- a. If the respondent replies “no” to both Q.C50 (Does [name] have difficulty using [his/her] hands or arms?) and Q.C51 (Does [he/she] have difficulty using [his/her] feet or legs?) then Q.C53 through C62 were skipped and recoded as “7” or “97” (legitimate skip).

Variables affected: PC51, PC52, PC53, PC54, PC55, PC56_1 through PC56_21, PC57, PC58, PC59, PC60_1 through PC60_18, PC61A through PC61D, PC62_1 through PC62_11

- b. If the respondent replies “no” to Q.C55 (Are [his/her] difficulties caused by a physical condition?), then Q.C56 through C62 were skipped and recoded as “7” or “97” (legitimate skip). If the respondent left Q.C55 blank, then Q.C56 through C62 were recoded as ● (missing).

Variables affected: PC56_1 through PC56_21, PC57, PC58, PC59, PC60_1 through PC60_18, PC61A through PC61D, PC62_1 through PC62_11

15. If the respondent replies “yes” or “don’t know” to Q.C63 (Has [name] always lived, since [he/she] was born, in the house or apartment building where [he/she] lives now?), Q.C64 through C68 were skipped and recoded as “7” or “97” (legitimate skip).

Variables affected: PC64, PC65_M, PC65_Y, PC66_M, PC66_Y, PC68_M, PC68_Y

16. If the respondent answered “yes” or “don’t know” to Q.C64 (Was [name] born in the United States?), then Q.C65 was skipped and recoded as “97” (legitimate skip).

Variables affected: PC65_M, PC65_Y

17. If the respondent replied “no” to Q.C69 (Is [name] a twin?), then Q.D2 through D4 in Section D were skipped and all the questions were recoded as “7” (legitimate skip).

Variables affected: PD2, PD3, PD4A through PD4F

Collapsed Categories

1. Where response categories contained very small cell numbers ($n < 10$), these categories were merged with other response categories.

Variables affected: PA22, PB7, PC65_Y

2. In Q.C62, several response variables were merged with other response variables due to small cell numbers. PC62_3 (walker) was merged into PC62_2 (crutches); PC63_6 (powered wheelchair) and PC63_7 (scooter) were merged with PC63_5 (manual wheelchair).

Variables affected: PC62_2, PC62_3, PC62_5, PC62_6, PC62_7

Out-of-Range Variables

1. When the response values were out of range, the variable was recoded as ● (missing). For example, if the respondent gave an age of 12 in answer to Q.A2, this value lies outside the usual range of adult consent, then Q.A2 was recoded as ● (missing).

Variables affected: PA2, PA39, PC4, PC8
